

# MIXED METAL OXIDE ANODE ACCESSORIES

REVISION 1

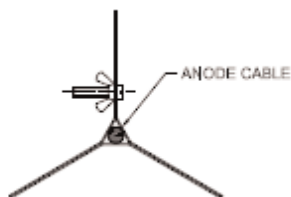

## APPLICATION

A range of accessories are available to assist with the successful installation of our Mixed Metal Oxide anode systems.

### SPOT WELDERS FOR UNDER TANK SYSTEMS

For connection of Titanium conductor bars to Mixed Metal Oxide Ribbon Anodes (see data sheet 2.2.2.)

DETAIL OF  
TYPICAL CENTRALIZER

### ANODE CENTRALISERS

For connection to tubular anode systems allowing them to centralise within the casing / borehole. Available in a range of sizes and materials to suit the application. When ordering please specify metallic or non metallic type and the size of borehole / casing they are being passed through.

### CABLE TIES AND CLIPS

A full range of cable ties and clips are available to secure multiple anodes chains in place for ease of installation. Please specify the required length, thickness and material when ordering.

# MIXED METAL OXIDE ANODE ACCESSORIES

REVISION 1

## END WEIGHTS

End weights are secured to bottom of an anode string / chain configuration to ensure cables remain straight during installation. Weights are calculated according to the anode cable and ground bed arrangement.
