

MIXED METAL OXIDE ANODE ACCESSORIES

REVISION 1

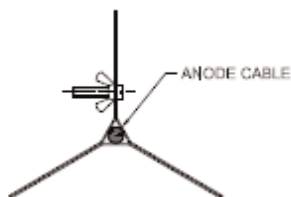

APPLICATION

A range of accessories are available to assist with the successful installation of our Mixed Metal Oxide anode systems.

SPOT WELDERS FOR UNDER TANK SYSTEMS

For connection of Titanium conductor bars to Mixed Metal Oxide Ribbon Anodes (see data sheet 2.2.2.)

DETAIL OF
TYPICAL CENTRALIZER

ANODE CENTRALISERS

For connection to tubular anode systems allowing them to centralise within the casing / borehole. Available in a range of sizes and materials to suit the application. When ordering please specify metallic or non metallic type and the size of borehole / casing the are being passed through.

CABLE TIES AND CLIPS

A full range of cable ties and clips are available to secure multiple anodes chains in place for ease of installation. Please specify the required length, thickness and material when ordering.

MIXED METAL OXIDE ANODE ACCESSORIES

REVISION 1

END WEIGHTS

End weights are secured to bottom of an anode string / chain configuration to ensure cables remain straight during installation. Weights are calculated according to the anode cable and ground bed arrangement.
