

Updated Statement from Directors on CPCL Response to Coronavirus

(COVID-19) – 16th March 2020

CPCL is working to maintain normal business operations whilst taking all sensible measures to minimise the risk to our staff from the COVID-19 virus.

We are following Government and public health guidance and appropriate control measures are being taken based on this guidance. The situation with COVID-19 is developing quickly and we intend to keep our staff, customers and suppliers updated as events unfold.

We are working closely with our supply chain partners to minimize the disruption to our operations due to the virus. The reduction in available air and sea freight traffic, together with embargoes on specific countries may have an effect on some customer deliveries. Where this is the case the customers concerned will be advised directly.

We ask for your patience and support during this difficult period. To assist in preventing the spread of the virus we have temporarily suspended visits by our staff to our customers and our suppliers. Similarly, we are asking our customers and suppliers to postpone visits to our premises, replacing these with web-based communications.

If you have any questions or queries regarding specific updates, please do not hesitate to contact our team members who will be happy to assist.
