

Updated Statement from Directors on CPCL Response to Coronavirus

(COVID-19) – 24th March 2020

In response to recent advice from the UK Government, CPCL operations have been modified per the guidance of the UK Government. The number of personnel working at our Grantham facility has been reduced to only those classed as essential with social distancing in place. All staff who can work from home are now doing so.

During these changes the company will endeavor to operate as normal a service as is possible. It is inevitable however that reduced staffing levels will impact on our capacity. Our global supply chain is also being affected by regional responses to the Coronavirus and by reduced international freight traffic. We therefore ask for your co-operation and understanding whilst we deal with this unprecedented challenge.

We are retaining all our staff during this period of disrupted operations and will return to full capacity immediately that government restrictions are lifted. In the meantime, our staff will be pleased to discuss any current issues or future requirements using the contact details below:

Main Switchboard Phone: +44 (0) 1476 590666

Specific Extension Numbers:
