

Galvanised Test Station

APPLICATION

A permanent durable test station used for the measurement of pipe to soil potentials, current flow, testing of insulated flanges, resistance bond and anode outputs. All internals are accessible via the lock fitted galvanised lockable plate.

The 'Custom' test stations are manufactured from galvanised steel

Cables are brought into the recess via a hollow and empty base, with the above ground elements being completely weatherproof.

Standard supply includes:

- 4" Galvanised Test Station
- Lockable plate for accessing connection terminals
- 5 x connection terminals for monitoring

Optional extras:

- Shunts
- Reed switch
- Critchley marker set
