

PCS Survey Viewer

Preview and analyze CP survey data files generated with an AllegroTM Field Data PC on a tablet or PC from anywhere.

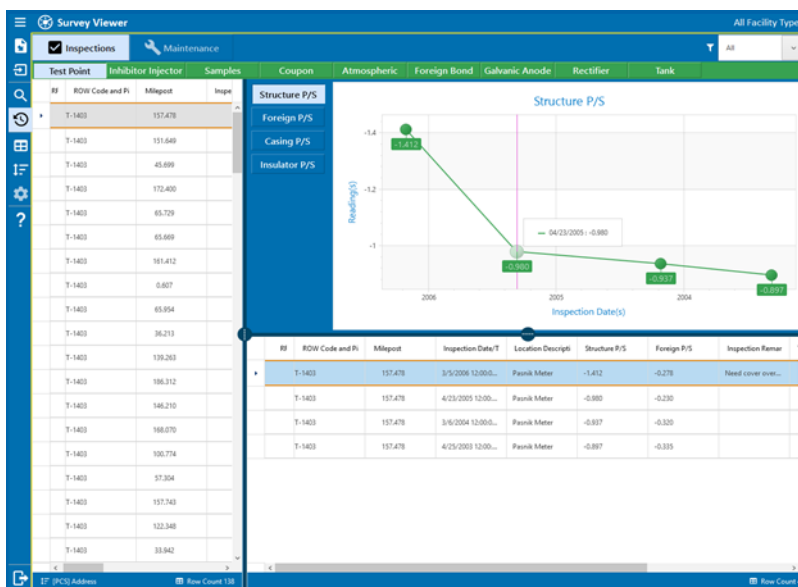

Use Survey Viewer to view historical survey data on a graph or grid for quick, in-the-field diagnostics.

Our Survey Viewer application works seamlessly with Allegro and PCS Compliance software so you can access and analyze your survey data files without an internet connection.

Preview surveys before sending them for review or committing them to your database, even if you don't have a full PCS license.

Use Survey Viewer's touch-enabled user interface to quickly access your survey files on Microsoft® Windows tablets.

Read any Allegro survey data file and send historical data with .DAT survey files for off-line comparison.

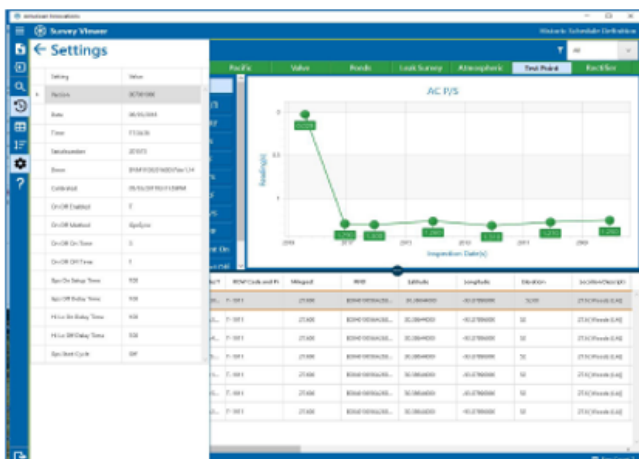

PCS Survey viewer

Survey Viewer provide an easy way to view Allegro survey files in the field and office.

Inspector	Station	Milepost	Location	Latitude	Longitude	RPD	Technician	Structure ID	Structure ID
ALLEGRO	10000000	0.0	Point	54.433722	-1.779337	1000000000	jeff	-1.0000	-1.0000
ALLEGRO	10000000	100	Northings	54.433722	-1.779337	1000000000	jeff	-1.0000	-1.0000

ALLEGRO	10000000	300	East	54.433722	-1.779337	1000000000	jeff	-1.0000	-1.0000
ALLEGRO	10000000	400	Do not take note	54.433722	-1.779337	1000000000	jeff	-1.0000	-1.0000

Analysing your data in Survey Viewer is fast and easy thanks to search capabilities and a robust filtering function

The survey settings feature provides a quick review of important survey information directly from Survey Viewer. Use it to verify your DVM SN and Calibration Date, as well as Reference Interruption settings to ensure current interruption sync with Allegro.

- Review survey files using a full PC display and keyboard all before leaving the site or uploading them to PCS
- Complete your review easily using tabs, a filtering function and search capabilities that are intuitive and consistent with the PCS grid view
- Display files in a read-only format, so your data will be reviewed according to the restrictions originally defined in the survey

Installation is simple: just establish a connection to the internet, click the link provided and launch
