The best protection...

For over 70 years
Cathodic Protection Co.
Ltd. has been leading the
fight against corrosion
and marine fouling.

Operating since 1950 in 6 continents, Cathodic Protection Co. Ltd (CPCL) is the preferred choice for companies requiring complete cathodic protection and marine anti-fouling solutions.

Our core values are entrenched within our business, using the principles of value engineering, ongoing product development and a strong network of strategic partners. We strive to deliver both cost savings and added value to our customers.

From the Thames Barrier in London, the Louvre Museum in Abu Dhabi, to the Koniambo Nickel Mine in New Caledonia, we have delivered complex projects across the globe. We combine consultancy, design and manufacture of bespoke materials and systems with an after sales service that is second to none.

Whether your project is large or small, as a client of CPCL, you will benefit from the expertise of world class cathodic protection and anti-fouling specialist engineers, providing the best solution to meet your needs.

Our Company Timeline

Cathodic Protection Co. Ltd. solutions

Cathodic Protection Systems

Our NACE/ICorr (ISO 15257) qualified engineers will work with you to design and project manage an appropriate, cost-effective CP solution. From detailed preliminary discussions our engineers will be on hand to support your team every step of the way. From initial proposals, throughout the design, supply and installation phases, to final commissioning and after sales support. Working to your brief and internationally recognised standards, we will ensure the end-result meets and exceeds expectations.

Field Engineering

We offer a complete package of site services including installation works, commissioning and maintenance of cathodic protection systems. Our team of qualified technicians and project managers can effectively manage and deliver all types of site related activities including site surveys, materials supply, installation supervision, commissioning, system handover and ongoing maintenance support.

Manufacturing & Procurement

With our strategic partnerships, economies of scale and in-house manufacturing facilities, we can supply a full suite of cathodic protection materials.

We manufacture key items, such as transformer rectifiers, switch mode power supplies, remote monitoring and control systems, junction boxes, anode assemblies and reference electrodes. Whether your requirement is a single component or full CP system, our experienced technical sales team will provide you with a cost-effective solution.

Anti-Fouling Systems

Our own anti-fouling department takes responsibility for design, manufacture, supply, and commissioning of Cuprion® marine anti-fouling systems. Each system is custom designed, considering client requirements such as water flow rate, duty cycle, pump maintenance interval and intake geometry. This ensures full anti-fouling protection between scheduled pump overhauls.

Transformer Rectifiers

For 35 years we've manufactured custom designed transformer rectifiers, earning an unrivalled reputation for reliability and quality. We were one of the first to develop a remote monitoring and control (RMCS) system for CP rectifiers. Our software engineers provide intuitive RMCS systems which can integrate with client DCS or SCADA systems. With attractive pricing and significant benefits, most clients choose CPCL's RMCS system for their TRUst™ transformer rectifiers.

Monitoring Solutions

We work together with partners who are leading providers in cathodic protection and integrity management. As well as remote monitoring and control for CP systems we offer control of pressure for water and gas pipeline networks, and monitoring of gas odorant. All hardware and software solutions are supported through our dedicated team.

With us, you can be assured of our quality and experience...

Leading the industry for 70 years, Cathodic Protection Co. Ltd. (CPCL) is a UK based company, with a network of representatives worldwide, working in many fields including oil, gas, power, petrochemical, civil engineering and renewables.

"We have been very impressed with CPCL's customer service, professional attitude, attention to detail and communication. They have always kept us up to date with developments, hit every deadline required and kept on programme while maintaining high levels of performance in safety critical environments. They have provided us with very cost-effective works and have proven to be excellent value for money. They are our first port of call for cathodic protection works and we look forward to working with them in the future."

Civil Engineering Contractor

"We have developed a great relationship with Cathodic Protection, their dedication to service is seamless, which enables us to keep our customers happy."

Network Gas Supplier

"All recent orders we have placed with CPCL have been delivered either early or bang on time. I just wanted to pass my thanks onto the team at CPCL."

Engineering Company

"Having a supplier that we can trust and rely on is incredibly important in our international business and we feel very fortunate that we are able to have found that with CPCL. CPCL is always accommodating to any of our requests and their work and service is always great. Thank you so much."

Procurement Specialist

Accreditations

We maintain a full suite of accreditations to international and industry standards including health, safety, quality and the environment.
